from the D. of Agre

Roc 1036 - Hc 265 of 25-26 d 20.3.26.

Requests that the amount proposed by the Dept. ~~for~~ under "Allowances for Salutries + Compounders" may be retained + that provision may be included in the budget for the opening of four dispensaries during the next year.

~~For~~ A Sum of Rs 960/ only, instead of Rs three thousand + odd recommended by the D. of Agre, has been agreed by the F. M. to be provided under "Allowance to Salutries" etc.

2 new vely. dispensaries were ~~to~~ sanctioned during ~~the~~ last year + four more during the current year. As the demand for fresh dispensaries is very great the ~~Director's~~ GV. Supdt's. proposal to open four dispensaries during the next year may perhaps be considered favourably. Provn required for fresh dispensaries is usually ~~considered~~ included at final budget time + the Finance Dept. may perhaps be requested to include this item for consideration in the list of urgent demands requiring prior consideration at final budget time.

11 There are at present 27 Vety. Hospitals & dispensaries in the State exclusive of the four dispensaries sanctioned during the current year, which have not yet been opened. The Mobile corps consists of 8 Vety. Inspectors, 8 Subastries & 8 peons. The ~~est.~~ estt. of 8 Subastries & 8 peons is being continued on a temporary basis from year to year. The Dept. has also been permitted to entertain a temporary estt. consisting of Vety. Surgeon 2 Subastries etc. to deal with Rinderpest, the expenditure on the account not exceeding Rs 10,000/- p.A.

12 Kind Reference is invited to the CV Supdt. letter dt 7.3.25 to the Dy. of Agre. in which he has discussed fully the question whether it would be advisable to open more dispensaries in the State or to increase the strength of Mobile corps. The CV Supdt. is of opinion for the reasons assigned by him in the above letter that it is more economical in the long run to open more dispensaries than to increase the strength of the Mobile corps.

111 In the file placed below, the C.V. Seafield - has expressed the opinion that it is more advantageous and more economical to increase the no. of Vet.l dispensaries in the State Hants add to the strength of the mobile Corps. In a personal conversation, however which I had with Major Simpson before he went to Europe, he expressed just the contrary opinion. He told me that the normal Vet.l needs of the State would be adequately met if we had about 35 Vet.l dispensaries - roughly one for every two talukas. and that for effectively dealing with Cattle Epidemics and the like a mobile corps of about 25 to 30 hands would be required. He was of opinion that there need be no doubt that about the whole of this mobile corps Establishment being fully employed all the year round. He said that if this Establishment was sanctd and a Sum of 1½ to 2 lacs of rupees placed at his disposal for ioc Serum, the Control of Cattle diseases & Cattle Epidemics could be made far more Systematic and efficient resulting in the course of 2 or 3 yrs. in a considerable reduction of cattle mortality and of expr. on Serum.

15 In this connection he also said that the present System of permanent immunisation of Cattle on payment was not appreciated by the public & that the free inocn for temporary immunity was a true Wash of money.

C.V. File No. 74 of 1925.

Serial No. 5

From The Dir of Agri.
No Rve 1932 H.C. 5037 2526 d 31/8
With refce to ll 4 opines it it is very necessary (1) to ensure the practice of opening at least four new dispensaries per year (2) to increase the Staff at least in the Vet Hospitals at T K Hd Qrs & (3) to make permanent at least the present mobile Staffs & forwards copy of letter no 2516 d 17/6/26 from the Supdt C.V.D. in the matter Subd for perusal & orders with reference to para 16 above.
Hdtr.
11/9/26.

The letter of the Supdt C.V.D. is for perusal. Both he and the Dir of Agri are of opinion that, in the existing circumstance, it will be necessary to increase the no. of Vet^y Dispensaries & to strengthen the staff in the Vet^y Hospitals, as well as to continue the present Mobile Corps, if not indeed to augment it.

It would seem from the statistics furnished that there is urgent need for increasing the no. of Vet^y institutions. The idea of having two Vet^y Asst^s — one a senior & the other a junior — at some of the important Hospitals, at least, is good. If one of the Asst^s attends to tour

NOTE Contn. Sheet

work by turns, the other will be attending to the hospital work at headquarters. The public will then have no grounds for complaining that for days together, the Vety. Supt is not available at Headqrs for attending to urgent cases, in the midst of his touring work. It is however mainly a question of funds.

2) The present Mobile Corps consists of 8 permanent Vet. Asstts and a temporary staff of 8 salutris + 8 Peons, continued from time to time. It would seem that the necessity for this small mobile unit, will always be felt, even with a much larger no. of Vet. institutions in the State. The staff may be made permanent.

3) The question of increasing the no. of Vet. dispensaries & of strengthening the staff of some of the Hospitals, has perhaps to be deferred till next year, for want of funds.

4) Subd for order. The temporary mobile corps may be made permanent.

Bangalore,

.....March 20, ...1926.

RS 23/3

FROM
G. H. KRUMBIEGEL, Esq., F.R.H.S.,
Offg. Director of Agriculture in Mysore,
Bangalore.

GEN. & REV. SECTT. Dr. 23 MAR 1926 To G. D. SECTT.

C.U 74-25. 2

To
R. Ranga Rao, Esq., B.A.,B.L.,
Secretary to Government of Mysore,
Medical & Agricultural Departments, Bangalore.

Sir,

I have the honour to refer to this office letter No.C.103 265 of 25-26, dated 2nd instant, forwarding a list of additional items required to be sanctioned for inclusion into the coming year budget, of the Civil Veterinary Department, and beg to emphasise the need for the extra amount provided under 'Allowances for Salustries and Compounders'. I find that the present allotment provided for a very limited number of men attending the classes, - while it is very essential that all the men of that class should get a training as early as possible, otherwise the work will be considerably hindered, and the difficulty now felt for want of trained men will be further aggravated by resignations which are becoming more numerous as work develops in other provinces ~~being taken up~~ where permanent posts are offered.

(1)

Under the provision for opening new dispensaries I reduced the amount by half i.e., providing for two instead of four new dispensaries.

Major Simpson points out that Government have already ordered that four should be opened annually.

I do not wish it to be taken that I consider this not necessary and if extra funds for four new dispensaries can be found provision might certainly be made, though even then I would rather see the temporary Inspectors of the Mobile Corps made permanent to prevent

our losing their services.

I have the honour to be,
Sir,
Your most obedient servant,

Offg.Director of Agriculture.

Ft. 74-25-3

SIR,

With reference to your letter No.I.C.7780/C.V.74-25-3, dated 10-5-26, I have the honor to forward for information of Government, letter No.25716 dated 17-8-26 from the Superintendent, Civil Veterinary Department, reporting on the question of the relative importance of increasing the Veterinary Dispensaries in the State as against sanctioning an increase in the strength of the Mobile Corps.

At present both these branches of the Veterinary service are inadequate to our needs and it is therefore not a practicable proposal to increase one at the expense of the other. The Hospitals and Dispensaries are however of a far more permanent importance than the Mobile Corps. There can be no doubt about the greater utility and benefit of a hospital within reasonable reach of the ryot - but our Veterinary Institutions are as yet too far apart and hence the Mobile Corps is indispensible.

But even when the number of hospitals and dispensaries has reached a workable limit, mobile service will still be required and I think the number of 14 Inspectors stated by the Offg. Superintendent is not overestimated.

A very urgent need is the sanction of a second Inspector for the Hospitals in Taluk Head-Quarters. In many towns as in Shimoga the Veterinary Inspector has to inspect the local market, the work in Veterinary Hospital itself is very heavy and when the Inspector has to go on tour this work suffers and causes great disappointment to people who have brought animals from long distances.

I hold that it is very necessary (1) to continue the practice of opening at least 4 new dispensaries ~~for June~~ per year, (2) to increase the staff at least in the Veterinary Hospitals of the Taluk Head-Quart and (3) to make permanent at least the present mobile staff. If the urgency of (1) and (2) are granted then the immediate need for action in regard to (3) is likewise established for these men can be drafted to the regular staff as need arises, whereas now they are leaving us whenever any permanent appointments are going in British Provinces. We have lost in this way some 18 or 20 men after giving them a good training. Our work is thus not only seriously handicapped but we also loose experienced hands for filling up stationary appointments.

I have the honour to be,
Sir,
Your most obedient servant,

Offg. Director of Agriculture.

Letter No.25716 dated 17th June 1926 from the Superintendent, Civil Veterinary Department, to the Director of Agriculture in Mysore, Bangalore.

With reference to your memo No.Roc.-Hc.503 dated 14th May 1926 calling for my opinion on the question of the relative importance of increasing Veterinary Dispensaries in the State as against sanctioning an increase in the strength of the Mobile Corps, and inquiring how many temporary men may be confirmed by reducing the number of new dispensaries to be opened, I have the honour to submit as follows:-

I append hereto a statement showing the area, number of Taluks and the animal census of each District, and the number of Veterinary Institutions existing in each.

The present number of Veterinary Inspectors in the Districts is 32 and allowing for those on leave we have not more than 28 at work Hence there is one Veterinary Inspector to every 3,22,248 animals and he has to tour approximately over an average of 1,049 square miles, in addition to his holding charge of an institution.

From the statement it will be seen that Mysore, Tumkur, Kolar and Bangalore Districts which are comparatively larger in area, and also richer in live stock, are being served by fewer institutions than the remaining Districts are, with the result that outbreaks of contagious disease cannot be promptly and effectively dealt with, as much time is spent in reaching distant villages, and the other result is that the work in the institutions has <u>decreased</u>. During the recent District Conferences of Mysore and Tumkur, at which I was present, the Deputy Commissioners have complained to me, that villagers coming from miles away, brining valuable cattle to the institutions for being protected against rinderpest, and for treatment of other ailments, such as an obstetrical case, and cases requiring surgical interference, such as removal of a badly injured eye ball, dissection of badly mulled testes, amputation of cancered horn etc., have had to go back disappointed, not finding the Veterinary Inspector to attend to such, and not knowing when he would be available.

To analyse the need for Veterinary Service, (1) the value of live stock (2) losses from disease and (3) the relative importance of -- different diseases should be the main factors. The recorded mortality from contagious diseases only (it has to be noted that only Rs.15/- per

7.

head, which is about the lowest figure, the monetary loss to the Agri[cultural] Community during the half year is not less than 4½ lakhs of rupees.

With an efficient and adequate staff, these losses could have been considerably minimised.

The points to be considered in deciding upon the number of [new] places at which, new dispensaries should be opened are (1) Animal Censu[s] (2) largeness of the jurisdiction of the existing institutions (3) are[as] where cattle are more than ordinarily susceptible to contagious dis[eases] (4) areas where periodical outbreaks of certain contagious disease are common (5) inaccessibility of the country and nonavailability of rapid modes of conveyance (6) contiguity of a Taluk to the bordering British Territory, where contagious diseases break out frequently.

To meet the requirements of the department, it is imperative [that] the number of dispensaries should be increased with a view to reduce the jurisdiction of each institution, as with a smaller area, the Veterinary Inspector would be in a position to deal with reported outbreaks promptly, and also be able to trace unreported outbreaks in the course of his tours, and by frequently looking into the Cattle Mortality Returns in the Taluk Offices and take prompt action. It also means less expenditure under serum, contingencies and travelling allowances, and saving of loss of cattle of ryots.

There are at present 10 hospitals and 22 dispensaries. Of these the hospitals of Bangalore and Mysore, should have whole time men to meet the requirements where the work is very heavy on account of, the large number of equine, canine and other species being brought for treatment in addition to bovines, the maintenance of breeding bulls, shoeing work, the number of in-patients, and on account of having to comply frequent requisitions from the citizens to attend to emergent cases at their residences. In addition to the opening of new dispensaries, it is absolutely necessary to strengthen the existing hospitals staff by the addition of two Veterinary Inspectors to each of the hospitals at Bangalore and Mysore, and one to each of the remaining 8 hospitals. This will enable the department to make suitable arrangements for continuity of work, when any of the staff in the District has to be granted leave on the score of illness or otherwise; -- Veterinary Inspectors could also be readily made available for being deputed to any area in the District, where the work at times would be urgent and

more than the Veterinary Inspector in charge could cope with. This would obviate the necessity of posting men from Bangalore or elsewhere to fill up leave vacancies, and dislocating work, and would result in savings under T.A. It would have a further advantage of affording some relief to an over worked Veterinary Inspector in a District, as the touring can be done by turns without one man having to toss about, over two or more Taluks throughout the year, and it ismuch easier for men, that are so attached to win the confidence of the ryots and turn out better work than Veterinary Inspectors of the Mobile Corps who are -- drafted from Bangalore to any part of the State, with which and the people of which, they had no opportunity of acquainting themselves. -- This would also reduce the chances of the Mobile Veterinary Inspectors and staff falling ill, by continuous touring in distant parts of the State, under varied climatic and other conditions.

The strength of the Mobile Corps, ever since the section was created has been 8 Veterinary Inspectors, 8 salustries and 8 peons. I append hereto a statement showing the number of outbreaks of contagious diseases (Rinderpest, Black-Quarter, Anthrax and Septicamia Hamorrhagica only) that were attended to and those that could not be attended to chiefly on account of the inadequacy of the staff. I also -- append another statement, showing the cattle mortality in the State during the past 2½ years under contagious diseases. Cattle fairs are held in different parts of the State, and it has been the case more often than not, that simultaneously with the holding of such fairs outbreaks of contagious diseases, specially of rinderpest and black-quarter have cropped up in different parts of the State.

In addition to increasing the number of dispensaries, if steps should be taken to combat contagious diseases on an effective scale, and an abatement in the ravages of contagious diseases is to be brought about the mobile staff should be strengthened by doubling it. The present staff,has been found quite inadequate in normal years, to meet the -- requirements of the Department. Prompt attention could not be given to a number of outbreaks, as will be seen in the statement. Salustries have had to be placed in charge of institutions when Veterinary Inspectors had to be granted leave; the required number of Veterinary Inspectors could

not be posted to cattle,fairs, for the important work of guarding [illegible] outbreaks, tracing of cases of contagious diseases and demonstration. All this is due to the inadequacy of the Mobile Staff.

Coming now to the question of Serum Simultaneous inoculations [illegible] rinderpest, taking it for granted that all the village cattle or all that are produced for such protection, could be dealt with by one Inspector in one day, the minimum No. of days the Veterinary Inspector has to be away from Head-Quarters, would be one full week, and the difficulties encountered in connection with this work have been brought to your notice in my letter No.25398 dated 11th June 1926 and I feel I need not refer to them here. Unless the Mobile Staff is strengthened, it would be impossible to deal with epedemic outbreaks efficiently and prevent their spread. The number of outbreaks that could not be attended to every year, would confirm this statement. Further, it would be quite impossible to undertake Serum Simultaneous inoculation work in all affected places and carry it on effectively, as long as we are understaffed for such work.

I am therefore not of opinion that the number of Veterinary Dispensaries could be reduced and my suggestions therefore are :-

(1) That two additional Veterinary Inspectors and two salustries should be attached to each of the Hospitals at Bangalore and Mysore.

(2) That one additional Veterinary Inspector and one salustry should be attached to each of the remaining 8 hospitals.

(3) That the number of dispensaries should be increased.

(4) That there should be a permanent Mobile Corps, consisting of at least 14 Inspectors, 15 salustries and 18 peons, of which 2 Inspectors, 2 salustries and 6 peons would be required in connection with virus production work.

(5) That this staff can be reduced, as the number of dispensaries increase.

The financial effect of this proposal will not be heavy, as considerable savings would be effected in the cost of serum, under leave arrangements, T.A. and contingencies, as with smaller jurisdiction and larger local staff in the districts, available for taking prompt action, there would be a marked reduction in the number of outbreaks, and -- mortality of live stock; in other words, an adequate and efficient

[redacted]inary Staff would be a form of Live Stock Insurance so vital to successful agriculture.

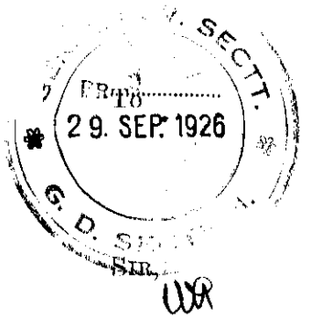
In reply please quote in full the Nos. and indicative symbol given below.
Roc.199-Hc.74 of 25-27.

Bangalore,
23rd September, 1926.

FROM

G. H. KRUMBIEGEL, ESQ., F.R.H.S.,
OFFG. DIRECTOR OF AGRICULTURE IN MYSORE,
BANGALORE.



To
J. Ranga Rao, Esq., B.A., B.L.,
Secretary to Government of Mysore,
Medical & Agricultural Departments, Bangalore.

SIR,

Adverting to Govt. order No.I.C.7619-21/C.V.63-25-3 dated 4-5-26 sanctioning the continuance of the staff of 3 Sub-Assistants and 7 Veterinary Stockmen to the Mobile Corps, I have the honour to forward herewith copies of letter Nos. 615 dated 14-7-26 and 2219 dated 2-8-26 from the Offg. Superintendent, Civil Veterinary Department, and to solicit the favour of your obtaining early Government sanction in the matter of confirming the said staff in their posts, in view of the reasons advanced therein by the Offg. Superintendent, Civil Veterinary Department.

I have already in my letter No.Roc.1933-Hc.505 of 25-26 dated 31-8-1926 emphasised the urgency of putting these men on a permanent footing to prevent constant resignation and ensure continuity in our work.

I have the honour to be,
Sir,
Your most obedient servant,

Offg. Director of Agriculture.

gsh.

This may be placed in the file in which a Proposition Statement has been called for from the Director for making the Mobile Corps permanent. The file was recalled after issuing the letter to Director, as per orders of Hon. Secy. (D.1351)

Please place this in that file.

Letter No.613 dated 14th July 1926 from the Offg. Superintendent, Civil Veterinary Department, to the Director of Agricultur in Mysore, Bangalore.

With reference to your No.Roc.954/Mc. of 25-26 dated 12th Ma 1926 forwarding a copy of Government Order No.I.C.7619-20-C.V.80-25 dated 11th May 1926 regarding the continuance of 8 salustries and 8 peons of the Mobile Corps for a further period of one year on a temporary basis, I have the honour to state that the Mobile Corps Staff in question have put in a service of nearly 6 years and that their case is very pitiable especially when they are granted leave Medical Certificate as the result of their unavoidable work in the Malnad areas; as they are borne on a temporary establishment basis they are not entitled to the leave allowances to which the permanen officers are entitled to and as such they are sustaining much loss both physically and materially. I therefore request you to kindly address the Government in the matter of confirming the said staff in their posts, considering their long service and their arduous task in unhealthy regions. I cannot afford to lose the service of the 8 salustries and 8 peons as they are specially trained and deserve all encouragement.

Offg. Director of Agriculture.

jsh.

for leave on Medical grounds. The few that do not so often succumb see that they, inspite of their efficient service, fare no better than the others, are discontented. The department is thus losing some of the best men, just as the gain sufficient experience and are able to show more progress in the direction of Serum Simulteneous inoculation.

In this connection, I beg to add that 14 Mysoreans are at present serving elsewhere and are drawing 3 to 4 times the salary they would have got, had they remained in Mysore.

I therefore request you will kindly bestow your sympathetic consideration to recommendations that have been made for ensuring a contanted and efficient Veterinary Service in the Stat.

Offg. Director of Agriculture.

Letter No.2219 dated 2-8-26 from the Offg. Superintendent, Civil Veterinary Department, to the Director of Agriculture in Mysore, Bangalore.

As desired by you, I have the honour to submit herewith a list showing the names of Veterinary Inspectors who resigned their appointments in 1925-26. The reasons for the length of the roll is not far to seek. They have been made clear in this office Nos.5267 dated 28-9-25 and 25398 dated 11th June 1926, to which I invite your kind attention.

They may be summarised as follows :

1) They are over-worked here in the Mysore Civil Veterinary Department, a Veterinary Inspector having to turn out 50 to 100% more work than he is required to do elsewhere in British India.

2) They are underpaid especially as compared with men of corresponding grades and service in British India. In the Punjab, for example, a Veterinary Graduate is started on Rs.100/-.

3) The adverse climatic conditions under which Veterinary Inspectors have in most cases to work.

4) Their frequent illnesses under pressure of hard-work in uncongenial surroundings.

5) The prolonged stay that they have to make in the villages in most of which they could hardly manage to have good food or decent lodging.

6) The constant travelling which keeps them out for more than 20 days in a month, and the inadequate allowances.

7) The ardous nature of work 50 per cent of the men in the department bear marks of injuries received in the course of their work.

8) The lack of prospects within view even when they have strained themselves to their utmost to discharge their several and responsible duties continuously and conscientiously to the entire satisfaction of their superiors.

These are the main factors that account for the numerous applications for leave on Medical Certificate and frequent resignations which result in a considerable dislocation of the work of the department.

A qualified Veterinarian takes up service in Mysore as a last resource considering the small pay and inadequate allowances. When he finds that the pay and prospects are not commensurate with the nature of work and hardships he has to undergo, he seeks for an appointment in British India. The work is all the more heavy and the halts in villages all the more prolonged since the adoption of the Serum Simulteneous Inoculation which is no where else conducted on such a large scale and with such excellent results. The results of such over-work coupled with the lack of means to overcome the discomforts and disabilities, is, that most of them break down in their health and often ask

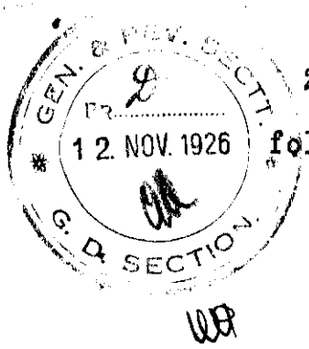
Cv. 74-27

No. 901/Books dated 11th November 1926. 2/1 letter & 2 Otts:



Forwarded with compliments duly verified.

2. The extra cost involved by the proposition is as follows:-

Mobile Corps Staff (Permanent) - N i l

Mobile Corps Staff (Temporary) - Rs 240 per mensem or Rs 2,880 per annum to the permanent recurring expenditure of the State against a reduction of a corresponding amount in the Temporary Expenditure.

Temporary Mobile Corps - It is not known if it is the intention of the Director to make this establishment also permanent. As per Government Order No.I.C.7979-80/C.V.87-25-2 dated 21st May 1926, the establishment has to continue for a period of seven months only from 1st June 1926 and the provision included in the Budget for 1926-27 on this account is also for the same period. The need for changing the pay of the Veterinary Inspectors from Rs 50/- to Rs 50-5-72 is not clear under the circumstances.

For Comptroller.

The Secretary to the
Government of Mysore,
Development Department.

C.V.94-25-8 23

Typed draft.

Proceedings of the Government, of H.H. the Maharaja of Mysore.

R e a d:-

G.O.No.IC.7619-20/C.V.80-25-2 dated 4th May 1926, sanctioning the continuance during the year 1926-27, of the -- staff of 8 salustries and 8 peons attached to the Mobile Corps of the Civil Veterinary Department.

2. Correspondence ending with letter No. R.O.C.1932/M.C.503 of 25-26 dated the 27th October 1926 from the Offg: Director of Agriculture, forwarding, through the Comptroller, a proposition statement (in duplicate) for continuing the Mobile Corps on a permanent basis.

O r d e r No. D.3992-4001

Dated 7th December 1926.

The Mobile Corps consisting of 8 permanent Veterinary Inspectors and a temporary staff of 8 salustries and 8 peons is employed on itineration and inoculation work and its services are also being utilised, according to necessity, in any part of the State where there is any epidemic cattle disease.

2. Besides the above, a purely temporary establishment consisting of 7 Veterinary Inspectors and an equal number of salustries, 3 peons and 1 Accountant has been specially entertained to deal with outbreaks of rinderpest, ~~which, of late years, is constantly appearing in a virulent form~~ -- in the State. This establishment which has been continued for the past some time, has been last ordered

to be continued till the end of December 1926.

3. The Director of Agriculture has submitted proposals to make the staff of 8 salustries and 8 peons mentioned in para 1 above, which is continuing as temporary since the last several years, permanent on the present scales of pay as noted in the margin. He has also proposed that the 7 temporary Veterinary Inspectors entertained, temporarily, in connection with the anti-rinderpest campaign and who are now getting a fixed pay of Rs.50/- may be given a graded scale of pay of Rs.50-5-72.

* Salustry Rs.20/- a month
Peon Rs. 8/- a month

4. Government are pleased to sanction the proposal to make the temporary staff of 8 salustries and 8 peons attached to the Mobile Corps staff, permanent on their present pay. The expenditure on account of the pay of this staff, viz., Rs.2880/- per annum will, from the next official year, be included as a permanent recurring expenditure in the Budget of the Civil Veterinary Department against a reduction of a corresponding amount in its temporary expenditure.

5. As the establishment of the temporary Mobile Corps which has been ordered to continue for a period of seven months only from 1st June 1926 will have to be disbanded, as soon as rinderpest subsides, in the State, Government consider that there is no need to give the 7 Veterinary Inspectors employed on that work, a graded scale of pay as proposed by the Director.
